Pattern health

Distribution of healthy, warning, and broken patterns.

Largest URL groups

Top 10 patterns by number of URLs.

What needs attention

Plain-English notes for patterns that may affect search traffic.

Pattern /blog/{param} covers 25% of URLs; 40% of sampled checks did not pass. Check how these pages open on the new site.

Pattern /legacy/{param} covers 15% of URLs; 80% of sampled checks did not pass. Check how these pages open on the new site.

Pattern /legacy/{param} contains a suspicious fixed segment legacy that may be a migration artifact.

Pattern /legacy/{param} has a high redirect rate (70%). URLs are live, but redirects may slow search engines down.

Pattern /old-sale/{param} covers 5% of URLs; 100% of sampled checks did not pass. Check how these pages open on the new site.

Pattern details

Click a row to review the sampled URLs for that pattern.

Pattern template ↑↓	Total URLs ↑↓	Coverage % ↑↓	Sampled ↑↓	Hit count ↑↓	Miss count ↑↓
/products/{param}	55	55%	5	5	0
/blog/{param}	25	25%	5	3	2
/legacy/{param}	15	15%	5	2	3
/old-sale/{param}	5	5%	3	0	3
